FUNDING FOR THIS GUIDE HAS BEEN PROVIDED BY THE COUNTY OF SANTA BARBARA PUBLIC WORKS DEPARTMENT; THE CITIES OF GOLETA, SANTA BARBARA, AND SOLVANG; AND THE CALIFORNIA DEPARTMENT OF RESOURCES RECYCLING AND RECOVERY (CALRECYCLE).

Graphic Design: Margy Brown

Editing contributions by Kaitlyn Haberlin and Tori Kampmann

This version of the Guide was printed in the fall of 2020. To see updates to this Guide until the next edition is printed, please visit our website: www.lessismore.org

Printed on 100% recycled paper.

Santa Barbara County Public Works Department Resource Recovery and Waste Management Division

The Resource Recovery and Waste Management Division (RR&WMD) has many innovative environmental programs designed to help residents and business owners create less waste, and to handle any generated waste properly. Currently the unincorporated areas of the County and the City of Goleta divert close to 75% of our waste, extending the life of our area landfills and lessening potential environmental impacts. However, much more must still be done to send less reusable and recyclable material to the landfill. Therefore, the RR&WMD will continue to develop and expand programs to divert more materials.

In early 2021, the County's ReSource Center will increase our community's recycling rate to above 85%, generate resources such as green energy and compost, and dramatically lower local greenhouse gas emissions. Thank you in advance for your participation in our programs to help meet our community's environmental goals!

While using this Guide, you will discover information and resources that will help you reduce the amount of waste you generate, and reuse and recycle products and materials that you have used.

If you have questions or suggestions for improvement, please contact Sam Dickinson at sdickinson@cosbpw.net, or call (805) 882-3618.

COVID-19 Waste and Recycling Impacts

The coronavirus has changed all of our day-to-day lives. The Resource Recovery and Waste Management Division has gone through many changes, as has the recycling industry as a whole. Because of this, you might notice that the **Less Is More Guide** looks a little different this year. Many businesses and organizations have changed their operations to keep their staff, partners, and customers safe.

Before visiting or dropping off any material at the locations listed in this book, follow these helpful tips:

- **ALWAYS** wear a mask or other form of face covering.
- Follow all safety procedures that each location has implemented.
- Call ahead to make sure that your items are accepted and when they can be dropped off.
- Only go out for the essentials.
- Be flexible and be prepared.

Remember, this Guide is a snapshot in time of reusing and recycling in Santa Barbara County. Safety protocols and operations change daily. We recommend that you contact each location before you visit to make sure they are open to the public and accepting materials.

The waste industry has also gone through many changes during the COVID-19 pandemic.

Many consumers are changing their habits, which directly affects waste. In Santa Barbara County, waste has changed in a few interesting ways:

- People are using the extra time at home to declutter and redecorate. This has caused a large rise in customers at our waste facilities. If you are also cleaning out your home, be prepared for potentially long lines at some waste disposal sites.
- Due to less in-store shopping, the amount of cardboard in recycling bins has majorly increased. Clean and dry cardboard is recyclable. Check out pages 6, 16-19, and 43 for cardboard recycling locations and tips.
- Take-out waste has also increased during the COVID-19 pandemic. Most take-out ware is not recyclable. If you are getting take-out or delivered food, request that staff don't include napkins or utensils and use a reusable option at home.

Reducing Your Waste

It's in your hands

Every year we throw away over 200,000 tons of waste into Tajiguas Landfill! You can easily limit the amount of trash you produce and throw away by following the **three R's**.

- **Aluminum** foil and pie plates (balled up or folded is best)
- Empty **cans of all types** (aluminum, steel, tin, bimetal and empty aerosol cans)
- **Glass**
- **Paper** (includes books, paper bags, newspaper, any glossy or non-glossy paper such as office paper, magazines, and junk mail; no waxed or laminated paper)
- **Cardboard** (no oil or food stains)
- **Plastics:** All plastic bottles and rigid plastics greater than 6" in size. Find out more about plastics on page 24. No bags, film plastic, or compostables.
- **Metals**, pots and pans (e.g. aluminum, copper, or steel)

TIP: rinse residue from glass, metal, and plastic containers.

- Aerosol cans (full or partially full). See page 25-26 to learn how to recycle.
- Automotive fluids. See page 25-26 to learn how to recycle.
- Batteries. See page 38-41 to learn how to recycle.
- Chemicals. See page 26-27 to learn how to recycle.
- Electronics. See page 51-52 to learn how to recycle.
- Fluorescent lights. See page 53-54 to learn how to recycle.
- Paints/solvents. See page 26-27 to learn how to recycle.
- Paper towels. Learn how to recycle at **[LessIsMore.org/Compost](https://www.LessIsMore.org/Compost)**
- Pottery
- Styrofoam and flimsy plastics
- Tissue and toilet paper
- Incandescent light bulbs

Items Requiring Special handling:

Household Batteries

Residential customers in the unincorporated areas of the County can have household batteries collected curbside for recycling. The household batteries should be placed in a clear plastic bag and **placed on top** of the blue recycling container on collection day. Tape the ends of rechargeable batteries. Visit page 38-41 for complete information.

Sharps

Single-family households in the unincorporated areas of the County may contact their local waste hauler to request a container for the collection of used sharps (needles). Visit page 30-31 for complete information.

Green Waste

Containers for green waste are provided by your hauler and serviced at your curbside. Green waste consists of leaves, grass clippings, and other yard trimmings and plant material, which are processed into mulch for beneficial reuse. Visit page 14 for complete information.

Trash

Reduce waste by prioritizing reusable and durable materials over single-use. All wet and/or dirty items are trash.

Landfill

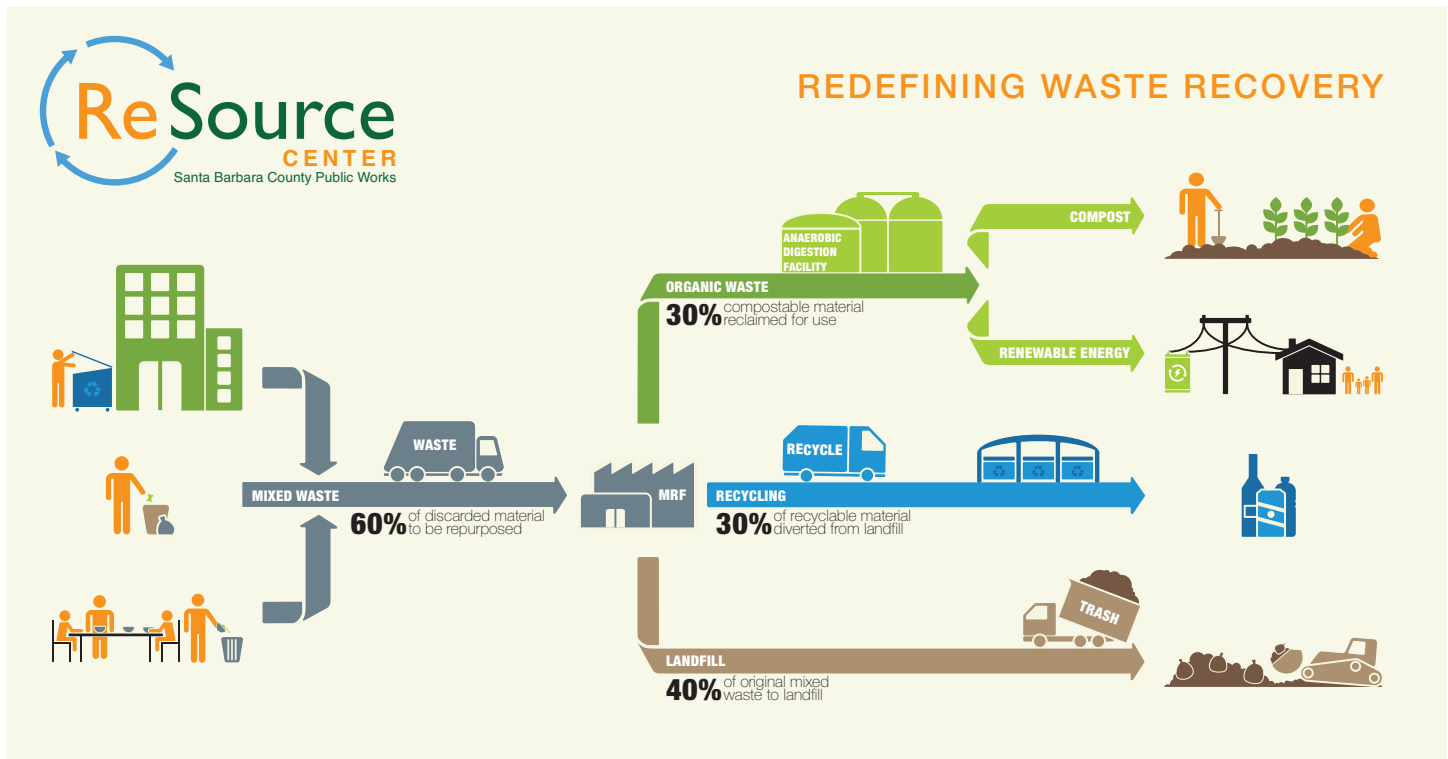

The non-recyclable materials are placed into a landfill, where they are covered daily in a system of compacted layers.

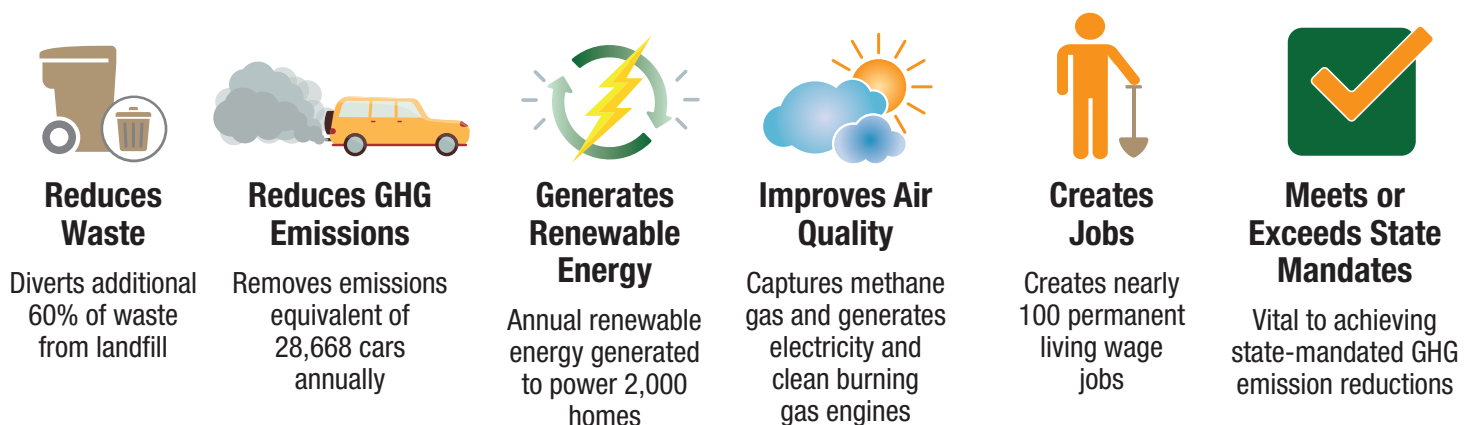

Introducing the New ReSource Center!

Redefining Waste Recovery

Santa Barbara County continues to expand its legacy of environmental leadership with the **ReSource Center**, a new cutting-edge facility that is fundamentally redefining waste recovery.

The ReSource Center converts commercial and residential waste into resources by recovering recyclable materials, transforming organics into landscape nutrients, and creating renewable energy in the process. With this new technology, approximately **60% of additional waste** from our trash cans **is diverted from the landfill**, bringing our region's diversion rate above 85% while significantly reducing greenhouse gas emissions. As our region continues to grow, the ReSource Center is an opportunity to prepare the next generation for responsible waste management and a healthier environment.

Learn more about this state-of-the-art Waste Management Facility at:
www.LessIsMore.org/ReSourceCenter

Service Providers in Santa Barbara County

Incorporated Areas

Residents and businesses within the Cities of Carpinteria, Goleta, Santa Barbara, Buellton, Guadalupe, Lompoc, Santa Maria, and Solvang should contact their cities directly for program information.

- City of Buellton, (805) 686-0137
- City of Carpinteria, (805) 684-5405, ext. 411
- City of Goleta, (805) 961-7500
- City of Guadalupe, (805) 343-1340
- City of Lompoc, (805) 875-8024
- City of Santa Barbara, (805) 564-5631
- City of Santa Maria, (805) 925-0951, ext. 7270
- City of Solvang, (805) 688-5575
- Vandenberg Air Force Base, (805) 606-2359 or (805) 605-1143

Unincorporated Areas

SOUTH COAST

MarBorg Industries

728 East Yanonali Street
Santa Barbara
(805) 963-1852

Service areas: Summerland, Montecito, Carpinteria Valley, Hope Ranch, Mission Canyon, unincorporated Goleta, Isla Vista, and the Cuyama Valley

NORTH COUNTY

Waste Management

1850 West Betteravia Road
Santa Maria
(805) 242-7937

Service areas: Lompoc Valley, Santa Ynez Valley, and Santa Maria Valley

Transfer Stations and Landfills

SOUTH COAST

South Coast Recycling and Transfer Station

A County-operated facility that serves as a **convenient collection point** for non-hazardous waste generated on the South Coast and processes approximately 200 tons per day of recyclable materials.

Tajiguas Landfill

A County-operated facility that serves the unincorporated areas of the County, including the Santa Ynez and New Cuyama Valleys, and the Cities of Buellton, Goleta, Santa Barbara, and Solvang. **Now the site of the newly constructed ReSource Center.** (See the previous page for more information.) Closed to the public without service accounts. Self-hauled waste can be taken to the South Coast Recycling and Transfer Station.

MarBorg Industries' Construction & Demolition (C&D) Debris Facility consolidates and sorts recyclable materials brought in by waste collection services, as well as contractors and residents.

NORTH COUNTY

City of Lompoc Landfill

Serves the City of Lompoc and the unincorporated areas of Mesa Oaks, Mission Hills, and Vandenberg Village.

City of Santa Maria Landfill

Serves the City of Santa Maria and the unincorporated areas of the Santa Maria Valley.

Santa Ynez Valley Recycling and Transfer Station

A County-operated facility that can process up to 212 tons of waste per day. It services the Santa Ynez Valley and self-haul waste from the Cities of Buellton and Solvang.

New Cuyama Transfer Station

A County-operated facility that serves New Cuyama residents.

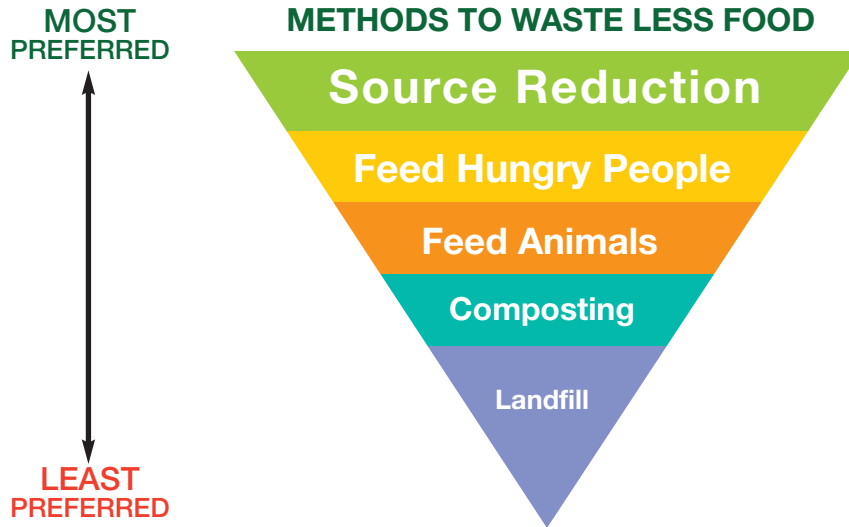

Ventucopa Transfer Station

A County-operated facility that serves Ventucopa residents.

Visit pages 16 and 17 for complete information about our Waste Collection Facilities.

Food Forward — Reduce Your Food Print

In America, an astonishing **40% of our food is landfilled**. Food waste is created throughout the entire supply chain: the farm, the grocery store, and at home. **In Santa Barbara County, 20% of what is landfilled is food.**

Simple Ways to Reduce Food Waste

TIP 1 **Inventory** and use what you have before you buy more.

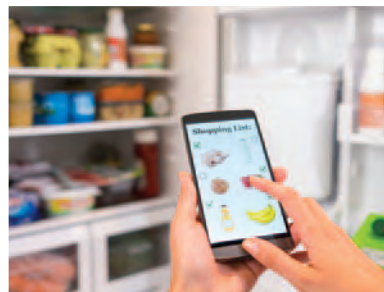

TIP 2 **Be creative** by using the edible parts of foods that you normally throw away.

TIP 3 **Donate** healthy, safe, and untouched foods to food banks.

TIP 4 **Freeze or preserve** surplus fruits and vegetables.

TIP 5 **Know how much food** you're actually wasting by measuring your waste.

TIP 6 **Reduce plate waste.** Start with a small serving—only what you can eat.

Have a green thumb?
Find ways to save seeds
or roots to regrow your
favorite snack!

Donate

Healthy, safe and untouched foods can be donated. Check page 54 to see where you can donate unprepared or prepared food. Please call ahead to confirm that your donation will be accepted.

Business Food Recovery

If your business creates lots of **edible food waste**, you can **donate it!** There's no need to waste perfectly edible food. Our staff can help your restaurant or food service facility **connect with local non-profits**.

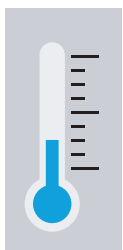

Before donating try these quick tips:

- **Get creative with your inventory.** Plan how every food item will be used.
- **Craft unique menu items** that use unserved foods or edible food scraps.
- **Work with local farmers** so your produce has the best chance for a long shelf-life.
- Make sure your whole staff is aware of **proper food storage**. **Freeze** as much as you can!

Large batches of foods are some of the best to donate. These include soups, baked goods, salsas, rice, beans, pastas, or unused produce.

Food safety is our number one concern. All items should be stored and transported in food grade containers, and in a safe temperature range.

Guidelines to follow when handling leftover food:

Cold foods must be maintained at **41 degrees Fahrenheit or below**. This is the safe temperature zone.

Example: Milk

Hot foods must be kept at **135 degrees Fahrenheit or higher**. This is the safe temperature zone.

Example: Lasagna

Frozen food must be kept below 0 degrees Fahrenheit.

Food items must stay within their correct temperature zone.

If foods leave this temperature zone, they must be composted or thrown away. Additionally, prepared foods should only be donated and eaten within the same day they are made.

APPLICABLE REGULATIONS

California's SB 1383 establishes a statewide mandate to achieve a **50% reduction in the disposal of organic waste by 2020 and a 75% reduction by 2025**. It establishes an additional requirement that 20% of currently disposed edible food be recovered for human consumption. SB 1383 also requires composting of organics that can't be consumed.

We want to help!

If you're a business owner and want to reduce your food waste, we can help you get started. **Call (805) 882-3600.**

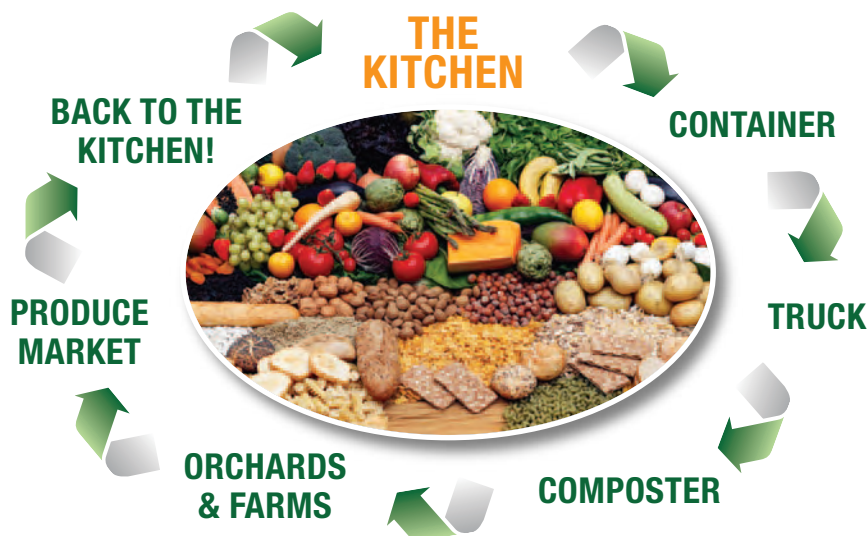

Unlike households, food service **businesses have the opportunity to donate prepared foods**. Prepared foods typically include leftovers from events and surplus foods from restaurants, hotels and grocery stores.

Business Food Scraps Collection

Does your business generate food scraps?

The County of Santa Barbara's program collects food scraps and transports the material to a local site where it's processed into compost for agriculture.

Call to find out how to participate:

(805) 882-3600 — Isla Vista, Summerland, Montecito, Goleta Valley,
and North County Unincorporated Areas

(805) 564-5627 — City of Santa Barbara

(805) 961-7565 — City of Goleta

Want to compost food scraps and yard waste where you live?

Follow these simple steps to get started:

1. Download our free composting booklet. Learn how to reduce your waste and create your own system.

2. Choose the composting system best for you.

Earth Machine Composting Bins are available year-round for half price, only \$45!

Get them at these three locations:

- **South Coast Recycling and Transfer Station:**
4430 Calle Real, Santa Barbara
Open Monday through Saturday from 7 to 5, Phone: (805) 681-4345
- **North County Public Works Building:**
620 W. Foster Road, Orcutt
Open Monday through Friday from 8 to 5, Phone: (805) 739-8750
- **Santa Ynez Valley Recycling and Transfer Station:**
4004 Foxen Canyon Road, Los Olivos
Open Tuesday through Saturday from 8:30 to 4, Phone: (805) 686-5080

3. Attend a free and fun workshop with our composting specialist.
These workshops are offered in convenient locations countywide.

Visit LessIsMore.org/Compost or call our Composting Specialist at (805) 882-3600 to learn more!

Composting — Food Scraps and Yard Trimmings

Food scraps and yard waste can make up as much as 30% of a typical family's trash. **Recycle these materials where you live** by composting on site to make your own nutrient-rich soil amendment for your garden.

Mulch Program

The County of Santa Barbara's mulch is an ideal product that is manufactured from **100% local recycled materials**. Using mulch in your garden **saves water** and completes the local green waste recycling loop.

NATURAL MULCH BENEFITS

- Conserves moisture in the soil
- Moderates soil temperature
- Blocks weed growth
- Reduces erosion
- Improves soil structure and fertility over time

Mulch helps preserve natural resources and protect the health of our planet.

How to get mulch:

Small amounts—

“Load your own” free pile at the South Coast Recycling and Transfer Station

Large amounts—

Can be delivered for as little as \$10/ton* or can be loaded into trucks at the following two locations for a small fee:

- South Coast Recycling and Transfer Station
- Santa Ynez Valley Recycling and Transfer Station

**Santa Barbara and Goleta city water customers can arrange for free delivery.*

For more information regarding mulch—

Call: (805) 681-4981

Visit us online at:
www.LessIsMore.org/Mulch

Green Waste Do's & Don'ts

Grass, leaves, small branches, flowers, ivy, plants.

Palm fronds, pampas grass, poisonous vegetation, food, animal waste, plastic bags, nursery pots, dirt, rocks or smelly socks!

The Green Business Program

OFFICE/RETAIL

RESTAURANTS

LODGING

Recycle at School

Since school waste is up to 80% recyclable, schools make a huge impact when they recycle. Recycling is also cheaper than trash disposal, so it helps save the environment and your budget. **There are many free services available for schools in the unincorporated county areas.**

FREE EDUCATION

- **Landfill and Transfer Station Field Trips** available to ages 7 and up. Contact the County at (805) 882-3618.
- Curriculum-fulfilling education for students through **Explore Ecology**. Contact Explore Ecology at (805) 884-0459.
- **The Environmental Education Box** with recycling information can visit your school (if you are in North County and served by Waste Management). Contact Waste Management at (805) 242-7942.

OTHER FREE SERVICES

Contact the County at (805) 882-3618.

- Indoor recycling containers
- Recycling posters, booklets, magnets and labels
- Waste audits and other help managing waste

Visit LessIsMore.org/SchoolRecycling for complete information and resources.

Plastics

Plastics currently accepted in your curbside recycling program:

- Any beverage container #1 and #2
- Any rigid container that once held a liquid
- Any rigid container larger than a gallon

From your **blue bin**, plastics join the rest of your recyclables to be sorted and baled at a recycling center.

PETE
Polyethylene
Terephthalate

EXAMPLES:
2 liter soda bottles,
cooking oil bottles,
peanut butter jars

RECYCLED INTO:
tote bags,
furniture, carpet,
paneling, fiber, and
polar fleece

HDPE
High Density
Polyethylene

EXAMPLES:
detergent bottles,
shampoo bottles,
milk jugs

RECYCLED INTO:
pens, recycling
containers, picnic
tables, lumber,
benches, fencing,
and detergent bottles

PVC
Polyvinyl Chloride

EXAMPLES:
outdoor furniture, water
bottles, salad dressing
bottles, liquid detergent
containers

RECYCLED INTO:
paneling, flooring,
speed bumps,
decks, and
roadway gutters

LDPE
Low Density Polyethylene

EXAMPLES:
food storage containers,
bread bags, sandwich
bags, dry cleaning bags,
produce bags, trash can
liners, shrink wrap

RECYCLED INTO:
compost bins, paneling,
trash can liners and
cans, floor tiles, and
shipping envelopes

What about plastic bags?

Please **DO NOT**
place them in your
blue bin.

First, try to reduce their
use by bringing reusable
bags when you shop.
Next, try to reuse any
plastic bags as much as
possible.

PP
Polypropylene

EXAMPLES:
aerosol caps, drinking
straws, margarine tubs,
straws, screw-on lids,
wet suits

RECYCLED INTO:
brooms, auto battery
cases, bins, pallets, signal
lights, ice scrapers, and
bicycle racks

PS
Polystyrene

EXAMPLES:
styrofoam cups,
plastic tableware,
meat trays, to-go
"clam shells" and
egg cartons

RECYCLED INTO:
egg cartons, vents,
foam packing, and
insulation

**Other
Plastics**

EXAMPLES:
various kinds of food
containers and
Tupperware, ketchup
and syrup bottles

RECYCLED INTO:
plastic lumber and
other custom-made
products

What is downcycling?

Plastics lose quality when they are
melted into new plastic products.
Many plastics are only recyclable
into new products one time.

EXAMPLE: Soda bottles end up
as items like fleece and house
siding. These products can
never be recycled into soda
bottles again.

Hazardous Waste

Hazardous waste must be disposed of properly. Hazardous waste pertains to products that contain chemicals that are **flammable, corrosive, reactive, or poisonous.**

PAINTS, STAINS AND SOLVENTS

HOUSEHOLD PRODUCTS

BATTERIES

AEROSOLS AND ADHESIVES

PESTICIDES AND FERTILIZERS

USED OIL

TIP: If not disposed of properly, hazardous waste is a threat to the health of living beings and the environment.

Transportation

Caution should be taken when transporting hazardous waste to a collection facility.

- **Household limit:**
15 gallons/125 pounds
- **Business limit:**
27 gallons/220 pounds

If possible, use the original product container or clearly label the container. Cover all containers with a secure fitting lid and pack containers upright in a leak-proof box. You may be asked to provide a detailed inventory, if you have complex chemicals or laboratory waste. Some facilities will also need an EPA identification number. **Please contact the facility directly for more specific information.**

Hazardous Waste Disposal Sites:

The following facilities accept hazardous waste from residents and businesses that qualify as a **Conditionally Exempt Small Quantity Generator (CESQG)**. CESQG means businesses that generate no more than 27 gallons or 220 pounds of hazardous waste per month.

SOUTH COAST

Community Hazardous Waste Collection Center (CHWCC)

University of California at Santa Barbara (UCSB)
Mesa Road, Building 565
Santa Barbara
(805) 882-3602

DIRECTIONS: Located on the UCSB Campus. Take Los Carneros Road towards Campus, turn left on Mesa Road. Once on Campus, continue on Mesa Road past the stop sign, and the Center will be the second driveway on the right.

The CHWCC is administered by the Santa Barbara County Public Works Department in partnership with the University of California, Santa Barbara.

HOUSEHOLDS
Saturdays 9 to 3, Sundays 11 to 3
No appointment
Small quantities of hazardous waste
Free

BUSINESSES
Appointments available on Fridays
Call (805) 882-3602
Charged a user fee

FREE MATERIALS REUSE PROGRAM
Enjoy access to a wide array of usable products such as **paints, cleaning supplies, pesticides, and home improvement products.**

Hazardous Waste Large Quantity Services:

For non-CESQG businesses (27 gallons or more) and large generator households (125 pounds or more) that wish to dispose of large quantities of hazardous waste all at once, call one of the following companies that provide pick-up services (except where noted) for a fee.

FULL SERVICE — ALL MATERIALS:

(except where noted)

Asbury Environmental Services

(310) 886-3400

(No biohazard waste)

BGI

(800) 549-0065

(No oil, oil filters, antifreeze, or biohazard waste)

(Biohazard waste only)

Safety Kleen

(805) 967-1448

Stericycle

(866) 783-7422

(Biohazard waste only)

Hazardous Waste Collection Events

Please note that semi-annual Household Hazardous Waste/Electronic Waste Collection events are held for households and businesses in the **Santa Ynez Valley** every spring and fall.

In addition, an annual Household Hazardous Waste/Electronic Waste Collection event is held in the **Cuyama Valley** every fall.

For more information on these events, please call (805) 882-3603.

If you are abating the asbestos yourself, call (805) 882-3602 to obtain the appropriate free bags.

Important Asbestos Information

Asbestos can pose a threat to human health when microscopic fibers become airborne and are inhaled.

Asbestos is most commonly found in pre-1980 construction: “popcorn” ceilings, pipe insulation, floor tile and mastic, roofing and fireproofing materials, and textured paints. Never dust, sweep, or vacuum these items or other products suspected of containing asbestos fibers.

Asbestos Bag Guidelines

- ✓ double bagged
- ✓ six millimeters thick
- ✓ specially marked bags indicating contents
- ✓ sealed (twist tied and folded over, and then sealed with duct tape)
- ✓ 25 pounds or less per bag (max 5 per trip)
- ✓ no holes or tears

If you have large quantities of non-friable asbestos (i.e. unable to be crumbled by hand pressure) in excess of 125 pounds, please call (805) 681-4345 to obtain a permit application and further instructions.

For information on disposal of filled bags or if you have any questions, please call (805) 882-3602, Monday through Friday, or visit LessIsMore.org.

Under the California Paint Stewardship Program, PaintCare Products are accepted for free at drop-off sites.

Visit www.paintcare.org or call (855) 724-6809 to find your nearest drop-off site.

Home Generated Sharps Collection Program

pen
needles

intravenous
needles

syringes with
needles

disposable
lancets

hypodermic
needles

It is illegal to place sharps in your trash. Keep sharps in an approved container. Follow these simple steps:

Two **FREE** Options for Residents

1. DROP OFF

Pick up a container at one of the County's Public Health Clinics and return it back to the same location when full. See the locations listed on the following page.

2. MAIL BACK

Call your trash hauler, **MarBorg Industries** or **Waste Management**, for a free container that can be mailed back when full.

*Note: If you live in Carpinteria contact **E.J. Harrison & Sons**.*

NOTE: You may also **purchase** containers at a medical supply company or pharmacy.

Mail it back!

— OR —

Drop it off!

For more information, please call our Sharps and Pharmaceutical Waste Specialist at (805) 882-3603 or visit LessIsMore.org.

The Details

For drop-off facilities, residents may not dispose of more than two sharps containers during any visit and are limited to one visit per week.

Hospitals, clinics, medical practices, pathology labs, convalescent homes, group homes, nursing facilities, hospices, and veterinarian hospitals are not eligible to use this program. **Visit LessIsMore.org or call (805) 882-3603.**

Never leave sharps containers unattended at a collection facility.

Drop-Off Facilities in Santa Barbara County

SOUTH COAST

Santa Barbara County Public Health Department

- **Carpinteria Clinic**
931 Walnut Avenue
Carpinteria
(805) 560-1050

Business and Multi-Family Housing

Businesses, apartments and condominiums are **required to recycle waste materials**. There are two options for recycling: **1) take recyclables yourself to a collection facility, or 2) arrange for recycling collection services.**

Contact Us Today

Call (805) 882-3600 or visit our website

LessIsMore.org

Multi-Family Complexes

Recycling is included as part of trash collection in most of Santa Barbara County, and does not cost extra. If you live in a multi-family dwelling and do not have access to recycling, check with your hauler to find out what is available.

Businesses

Recycling is priced less than trash service for businesses, and can save companies money on waste disposal. County staff can help businesses in the unincorporated areas manage waste more effectively.

Recycling Market Development Zone (RMZD) Program

CalRecycle offers below market rate loans to businesses that use post-consumer or secondary waste materials to manufacture new products, or that undertake projects to reduce the waste resulting from the manufacture of a product.

More Help for Businesses

CalRecycle offers assistance to businesses that use recycled materials and fosters recycling markets. It also promotes the efficient collection and recycling of secondary materials into high quality, value-added products.

TIP: Businesses may receive up to \$2 million or 75% on a project's cost, whichever is less.

Find out more at
www.calrecycle.ca.gov/RMDZ

To find products that contain recycled content please see pages 32-35,
or visit: www.calrecycle.ca.gov/RCPM

Reuse and Recycling A-Z

The following companies accept materials for reuse or recycling.

Please call ahead to verify operating hours and materials accepted.

Aerosol Cans

Place in your blue bin recycling container.

See the Household Hazardous Waste section on pages 25-27.

Aluminum

To see complete options, flip to **Recycling Drop-Off and Buyback Centers** on pages 18-19, and **Waste Collection Facilities** on pages 16-17.

SOUTH COAST

Bags (Reusable)

ChicoBag Company

c/o Zero Waste
13434 Browns Valley Drive
Chico, CA 95973
(888) 496-6166

www.chicobag.com

(Accepts woven reusable bags that will be distributed to families in need, or used for art.)

Batteries (Household)

Residential customers in the unincorporated areas of the county can have household BATTERIES COLLECTED CURBSIDE for recycling.

TIP 1: For safety purposes, please tape the positive ends of rechargeable batteries with clear tape.

TIP: If you live in multi-family housing and have centralized trash and recycling service, please consult with management or use this guide to determine the nearest battery collection location.

In the list on the following pages, look for the color to see which type of batteries are accepted: **green** for **non-rechargeable**, and **red** for **rechargeable**.

If any of these stores that sell rechargeable batteries refuse to accept used rechargeable batteries for recycling, please call (805) 882-3600.

The locations listed below accept household batteries for FREE. Please note that the list continues on the following pages.

See the firms listed under the Construction Waste category on page 48.

Electronics

Anything with a cord or battery is considered e-waste and does NOT go in the trash. Please save up these materials and bring them in to a collection center.

Common examples: televisions, computers, copiers, printers, and phones.

These items contain toxic materials such as lead and mercury, so if they are thrown into the trash they could potentially contaminate the soil and groundwater.

Use the available resources below to repair, reuse, or recycle electronic equipment.

TIP: Many Waste Collection Facilities listed on pages 16-17 will accept electronics for recycling. Please call ahead to verify acceptability of items.

TIP 2: Many of the Thrift Stores listed on pages 20-21 will accept electronics in good condition for reuse. Please call ahead to verify acceptability of items.

Food

In America, an astonishing **40% of our food is landfilled**. The waste is generated at each step of the way: at the farm, the store, and at the consumer level. In Santa Barbara County, 20% of what we landfill is food.

TIP 1: Donate your leftover food to reduce the amount of waste entering the landfill. Call first before dropping off food donations.

TIP 2: If you can't donate your food waste to people or animals, you can compost your food waste where you live. Visit page 12 and 13 for information.

Pharmaceutical Waste (Medications)

NO! Traditionally, consumers have thrown unwanted medicines or pharmaceutical waste into their trash containers, have poured them down their sinks, or have flushed them down their toilets.

YES! The best option for households to dispose of their pharmaceuticals is to **take them to an approved drop-off facility.**

In June 2016, the County of Santa Barbara Board of Supervisors passed an ordinance that requires pharmaceutical manufacturers to establish and fund a collection program for unwanted household medications sold in the county. In early 2018, new collection kiosks were installed at pharmacies, clinics, and law enforcement sites throughout the county (see list below). Residents can deposit prescription and over-the-counter medications in the kiosks, free of charge. Details about the program are available at www.Med-Project.org

The following locations accept expired and unwanted medications from households only:

More Information

California Air Resources Board (800) 242-4450

www.arb.ca.gov/homepage.htm

Information about the following: air pollutants, air toxics, asbestos, bicycles, consumer products, diesel topics, energy, fuels, general topics, health, indoor air quality, marine engines, permitting activities/certifications, seminars, small off-road engines, and vehicles.

California Department of Resources Recycling and Recovery (CalRecycle) (916) 322-4027

www.calrecycle.ca.gov

CalRecycle's mission is to protect public health and the environment by effectively and efficiently managing California's waste disposal and recycling efforts. CalRecycle's website contains resources to help people reduce, reuse, and recycle.

(800) 424-9346 or (866) 372-9378

Visit www.epa.gov/ and search: **Consumer Handbook for Reducing Solid Waste**

The U.S. Environmental Protection Agency publishes a Consumer Handbook for Reducing Solid Waste that offers tips on the following four principles:

REDUCE the amount of trash discarded;

REUSE containers and products;

RECYCLE materials, use recycled materials, and purchase products containing recycled content; and

RESPOND to the solid waste problem by avoiding waste generating activities and expressing preferences for less waste.

FOR BUSINESSES

See Business and Multi-Family Housing on page 36.

Governor's Office of Business and Economic Development (GO-BIZ) (877) 345-4633

www.business.ca.gov/Home.aspx

This office serves as a one-stop shop for businesses by offering such services as attraction, retention and expansion services, site selection, permit streamlining, clearing of regulatory hurdles, small business assistance, international trade development, assistance with state government, and more.

FOR RESIDENCES

California Department of Toxic Substances Control (DTSC) (916) 322-0476

www.dtsc.ca.gov

The Department of Toxic Substances Control (DTSC) regulates hazardous waste, cleans up existing contamination, and looks for ways to reduce the hazardous waste produced in California.

Californians Against Waste (CAW) (916) 443-5422,

www.cawrecycles.org

Californians Against Waste (CAW) is dedicated to conserving resources, preventing pollution, and protecting California's environment through waste reduction and recycling policies and programs.

Key Terms

ABOP is an acronym for **A**ntifreeze, **B**atteries, **O**il, and **P**aint. An ABOP center is a facility that only accepts these types of household hazardous waste and oil filters.

Aseptic Packaging refers to products containing a mix of paper (70%), plastic (24%), and aluminum (6%), commonly used for soup and juice products. Aseptic packaging is not recyclable in the curbside collection program.

Biodegradable refers to a product that can be broken down by bacteria and returned to the natural environment.

Buyback Centers are facilities that will buy or accept for free certain common recyclable materials.

Certified Redemption Centers are located at many supermarkets and accept recyclable glass, plastic, and aluminum beverage containers marked with California Redemption Value (CRV).

Closing the Loop is when consumers buy a product that contains recycled-content material.

Compost is the product resulting from the controlled decomposition of organic debris which is then used as a soil amendment. Materials that can be composted include: leaves, grass clippings, fruit and vegetable trimmings, and other organic materials commonly found in municipal waste.

Construction & Demolition Debris (C&D) is material generated during construction or demolition activities that is mostly recyclable. Common materials include concrete, drywall, and wood.

Curbside Collection is the process whereby waste materials are collected curbside for eventual disposal or processing.

Electronic Waste (E-waste) is an item that either plugs in or contains batteries, and should NOT be thrown in the trash.

Grass Cycling is when grass clippings are left on the lawn when mowing, returning valuable nutrients to the soil.

Household Hazardous Waste (HHW) does NOT belong in the trash as it is flammable, corrosive, reactive, and/or poisonous. Examples of HHW include paint, motor oil, cleaning products, and insecticides.

Landfill is a place to dispose of municipal solid waste by burying it in a series of compacted layers, alternating dirt and waste up to a permitted amount.

Mulch is a soil covering made of organic materials such as yard trimmings and is commonly placed around plants to retain soil moisture, control weeds, prevent erosion, help maintain even soil temperature, and enrich the soil.

Recyclable means that a given material can be processed into a new product.

Recycled-Content is the portion of a product's or package's weight that is composed of materials that have been recovered from waste; this may include pre-consumer or post-consumer materials.

Source Reduction is the design, manufacture, purchase or use of materials and products to reduce the amount or toxicity of what is eventually thrown away.

Transfer Station is a facility where trash and recyclables are unloaded from collection vehicles and then subsequently reloaded onto larger long-distance transport vehicles for shipment to landfills, recycling facilities, or other treatment or disposal facilities.

Universal Waste refers to hazardous waste that is generated by a large percentage of the population and should NOT go in the trash. Examples include: batteries, thermostats, fluorescent bulbs, cathode ray tubes, electronic devices, and non-empty aerosol cans.

Vermicomposting is the process whereby worms feed on slowly decomposing materials (vegetable and fruit scraps) in a controlled environment to produce a nutrient-rich soil amendment. This is the ideal way to produce high quality compost indoors.

Notes

[illegible]

Solid Waste Collection Contacts

Depending on the location, solid waste collection companies will collect recyclables, greenwaste, and trash. To subscribe for service, or to learn more about available services, please contact your local hauler.
